Camera di Commercio
Ravenna

“Operational Excellence, Carbon neutrality, Circular economy, Technology are the pillars of tomorrow energy industry.”

Reshaping the Energy Industry: Action for Transition

With energy transition and sustainability as the watchwords of the day, the industry needs to embrace the future by leveraging new partnerships to turn the strategy into action. With a need for new business models to future proof the sector, ensuring equitable economic growth as well as sustainability can only be achieved by innovating and embracing new alliances. With this in mind, OMC 2023 is the premier platform for the region’s energy authorities, industry CEO’s, contractors, research institutions and consumers to assess the practical policy, technical and financial steps needed to evolve the Mediterranean energy sector to embrace, meet and exceed the COP26 accords.

The Mediterranean energy scenario and transition toward a lower carbon future revolves around the outcomes of COP26 and the hopes of COP27. With the sector now embracing the change needed as well as forging new partnerships amongst industry allies to accelerate energy transition, partnerships between energy producers as well as the growing manufacturing industry of the region are just some of the issues that the OMC 2023 conference will tackle.

The COP26 outcomes and COP27 aims are specifically targeted to aid the transformation of the global economy and with cutting edge innovation as well as practical and applied solutions, the global energy landscape looks set to dramatically change in the coming years. To support this admirable goal, we will work closely with industry, academia, policy makers and financiers as well as startups and SMEs to address the challenges that affect us all.

“It is now time to turn commitments into actions”

Climate change has been on the international agenda for a long time, with the UN SDGs making social, economic and environmental sustainability central to economic development.

Unfortunately, the impacts of the pandemic cast a shadow on achieving the emissions targets as scheduled having reduced incomes, cut government and companies budgets worldwide. This has contributed to widening the gap between developed and developing countries.

Climate change is no doubt the priority. The last Cop26 summit intended to strengthen the global commitment and draw the world’s attention on the urgency of taking more stringent actions to achieve decarbonization by 2050.

A change of pace is mandatory: it is time to turn commitments into actions.

These include smart and targeted policies, appropriate investments and innovative technologies to be urgently implemented to transition value chains in the near future and, in particular the hard to abate and energy intensive sectors, to reduce the adverse effects of climate change.

A long list of commitments was drafted by all stakeholders attending the summit. In order to meet them an integrated approach and close cooperation at every level become imperative to progress action on everything from standards, finance, methane and more, showing that an economy-wide mobilisation is emerging. The summit also pointed out a need of transformation in citizens and consumers’ behaviour.

OMC 2023 promises to continue and further develop the debate on energy transition and sustainable development. After rethinking energy we are now focusing on reshaping the energy industry: translating ideas into actions.

For this reason OMC will continue gathering diverse stakeholders to debate on aligned goals and co-operate to put solutions into practice backed up by cross-sector partnerships.

The next conference in May is investigating the evolving energy landscape after Cop26 and the specific transition challenges facing the different countries of the Mediterranean region, how companies can transform their business to take on the challenges of resilient growth and decarbonization.

We will focus on sector coupling as an example of real alliance amongst industry sectors, discuss about the energy vectors of the future – Hydrogen, Nuclear, current CCUS achievements, the partnerships between producers and the hard to abate manufacturing industry.

Strongly motivated by the astonishing success at the last edition, the innovation room is hosting startups, SMEs, young professionals, University researchers and students working closely on projects that span across the energy industry and business, giving them all the opportunity to show their great potential to reshape the energy industry of the forthcoming decades.

I invite you to join us at OMC Med Energy Conference in Ravenna.

Monica Spada

Chair OMC 2023
Head of Research & Technological Innovation, Eni

“CEOs and/or Executive VPs
of IOCs and NOCS, and Energy companies”

OMC ADVISORY COMMITTEE

Recently established, the OMC ADVISORY BOARD features among its Members representatives of Ministries for Energy from EU and Mediterranean Countries, International governmental institutions, International associations operating in the field of energy and engaged to promote energy transition, CEO and/or Executive VP of IOCs and NOCS, and Energy companies.

The mission of OMC ADVISORY COMMITTEE is to provide different perspectives, to share points of view and knowledge, and to promote dialogue on energy issues, in order to define the specific topics to be discussed during the annual OMC Med Energy Conference.

It also aims at identifying common messages and positions to be shared within the energy sector.

MEMBERS SO FAR INCLUDE:

Tarek El Molla

Minister of Petroleum and Mineral Resources of Egypt

Mohamed Oun

Minister of Petroleum and Gas of Libya

Kadri Simson

European Commissioner for Energy

Charalambos Rousos

Director of the Energy Service, Ministry of Energy Cyprus

Toufik Akkar

CEO, Sonatrach

Mustafa Sanalla

Chairman, NOC

William Lin

EVP, Regions, Cities & Solutions, BP

Torger Rød

CEO, Vår Energi

Laurent Wolfsheim

SVP Strategy Growth & People Gas, Renewables and Power, TotalEnergies

Walburga Hemetsberger

CEO, Solar Power Europe

Angus J. Gillespie

Manager European Affairs, Global CCUS Institute

Stefano Venier

CEO, Hera

Rabia Ferroukhi

Director Knowledge, Policy and Finance, IRENA

Houda Ben Janet

Director General, OME

Roberto Vigotti

Secretary General, Res4Africa

Tarek Emtairah

Director Energy, UNIDO

Grammenos Mastrojeni

Secretary General, Union for the Mediterranean

Patrizio Pagano

Head of Secretariat to the Governing Board Directorate, Banca d'Italia

Francesco Balestrino

Worldwide Product Manager Renew. and Green Technologies, Xsight Saipem

Stefano Maione

Chief Development, Operations & Technology Officer, Eni

Edoardo Dellarole

OMC 2023 Programme Committee Chairman

Monica Spada

Chair OMC 2023

OMC CONFERENCE QUOTES

One of the cornerstones of our commitment will be ever-closer cooperation with the southern Mediterranean, also with regard to the interconnection of electricity systems.

Kadri Simson

Commissioner for Energy, European Commission

Collaboration between all the countries in this area will be fundamental to face this energy challenge in the best possible way: but I believe we must be optimistic.

Natasa Pilides

Minister of Energy, Industry and Commerce of Cyprus

The agreements with the European Commission for energy development are very significant. For our country, the transition to renewable energy is crucial.

Tarek El Molla

Minister of Petroleum and Mineral Resources of Egypt

Energy must be developed in a sustainable way, thanks to new technologies. And we are looking for private individuals who are willing to invest in Libya in this field.

Mohamed Oun

Minister of Oil and Gas of Libya

Solar & wind will be the main energy resources by 2050. In particular, solar energy is a key climate solution because of its cost, versatility, democratic nature, and reduced CO2 emissions.

Walburga Hemetsberger
CEO, SolarPowerEurope

In order to bridge the energy efficiency gap between Southern and Northern Mediterranean countries and move towards an ecological transition, regulations and policies are important. However, cooperation between countries is crucial.

Houda Ben Jannet
Director General, OME

We need an inclusive approach to decarbonization, a vision where all the available solutions are fully exploited, following a logic of effectiveness and efficiency. Let Italy be a bridge between the Mediterranean region and Europe.

Giuseppe Ricci
President, Confindustria Energia

In a complex world, what we need is inclusiveness and sustainability. It is essential to combine the needs of industrial development and the environment

Luigi Ciarrocchi
CCUS & Forestry Director, Eni

We shouldn't forget that the climate issue is a multi-faceted problem to be addressed considering all the available options, with a flexible interpretation and a focus on energy efficiency.

Stefano Venier
CEO, Hera

Transportation /Logistics	3,68%		

OMC 2023 PROJECTIONS

OMC is the Mediterranean's most important event for those seeking to reshape their business strategies and discover fresh opportunities in the new energy landscape. As major hydrocarbons producers, processors and consumers make the ongoing positive shift to decarbonise their business practices, OMC welcomes the international leaders and influencers that will decide what our industry will look like in the coming decades.

The European Union has ratified binding agreements for member states to reduce their CO2 emissions by 55% before 2030 - a highly-ambitious programme that makes Europe the most advanced region in terms of delivering on Cop commitments. As a result, leading Mediterranean energy producers, particularly those operating in hydrocarbons fields, will need to stay ahead of the game and deliver on shareholder and policy commitments rapidly. Change is already happening at pace and major international oil and energy companies are transforming their businesses to meet requirements.

“There is no other event in the Mediterranean region with such an outstanding success despite all the difficulties experienced by business and productive activities in the last years.”

OMC 2023 AGENDA

22 MAY 2023 (Monday)

- 9,30-13,00 Workshops, Local schools @OMC 2023
- 17,00-18,30 Hall 7 Showcase
- 19.00 Aperitif

23 MAY 2023 (Tuesday)

- 09,00-18,00 Exhibition opening, B2B Matchmaking
- 09,45-10,30 Welcome Addresses
- 10,30-13,00 Opening Plenary Session
- 14,30-18,00 Technical Sessions, Innovation room, Process Equipment Zone, Exhibitor Showcase
- 21,00 Gala Dinner

24 MAY 2023 (Wednesday)

- 08,30-09,30 Business Breakfast
- 09,00-18,00 Exhibition opening, B2B Matchmaking
- 09,00-13,00 Panels, Technical Sessions, Innovation Room, Process Equipment Zone, Exhibitor Showcase
- 14,30-18,00 Business Panel, Technical Sessions, Innovation Room, Process Equipment Zone, Exhibitor Showcase

25 MAY 2023 (Thursday)

- 08,30-09,30 Business Breakfast
- 09,00-15,00 Exhibition opening, B2B Matchmaking
- 09,00-13,00 Panels, Technical Sessions, Innovation Room, Process Equipment Zone, Exhibitor Showcase
- 13,00-14,00 Closing Remarks and Award Ceremony Lunch

CALL FOR PAPERS

“The Energy Industry continues to evolve to become carbon neutral”

Energy transition forms one of the pillars for delivering a global sustainable environment and is one of the commitments to climate change targets.

The energy industry has transformed and continues to evolve to become globally carbon neutral within the next decades; to this purpose huge investments are being put into it worldwide. OMC - MED Energy Conference 2023 - delightfully welcomes all the researchers, professionals and students willing to share their experiences through research talks and presentations from diverse fields in energy. The event provides the ideal platform for experts to exchange their ideas and therefore contribute an integrative approach to speed up energy transition towards a sustainable future.

New technologies, business innovation and new alliances will be key to start reshaping energy. They are called to push forward gas valorization and carbon neutrality practices while developing clean energy sources as an integrated and synergic process to provide clean and affordable energy in a low-emissions future.

To address these challenges, we encourage paper submissions and we invite you all to submit an abstract and join the community of technical experts from around the world who are gathering in Ravenna next May.

Edoardo Dellarole

Chair OMC 2023 Programme Committee
Research & Technological Innovation
Head of Electrification, Eni

“OMC provides the ideal platform for experts to exchange their ideas and therefore contribute an integrative approach to speed up energy transition towards a sustainable future.”

CALL FOR PAPERS TIMELINE

31st October 2022
**400-800 WORD ABSTRACT
SUBMISSION DEADLINE**

OMC 2023 Programme Committee will evaluate all extended abstracts received by the deadline.

15th January 2023
**SELECTED ABSTRACTS
NOTIFICATION**

Authors will receive notification of acceptance and detailed paper editing instructions.

15th April 2023
**PAPER MANUSCRIPTS AND
SPEAKER'S REGISTRATION DUE**

Full manuscripts must be sent for inclusion in the conference proceedings and speaker registration (max 2 per paper) must be settled by this date.

10th May 2023
PPT SLIDES DUE

Full ppt presentations to be sent to the conference office

23rd - 25th May 2023
**IN PERSON
PRESENTATION**

Speakers must take part in the event and present their work to the audience.

HOW TO PREPARE THE ABSTRACT

Length: minimum 400 - maximum 800 words in English.

Abstract content: major new contributions in terms of knowledge or experience in the energy sector, possible applications of the information provided, results and major conclusions, any technical, economic and innovation contributions. No tradenames allowed.

Please ensure you choose the appropriate theme under which to submit your abstract.

Make sure that your abstracts:

- reflects a work that is completed at the time of submission and not plans or ideas still taking shape in the mind of the author or research that is still highly immature.
- is a concise, informative, accurate representation of the final paper and not a mere recital of the subjects to be covered.
- had no prior publication or circulation!

Submit your abstract on www.omc.it/en/call-for-papers

TECHNICAL CATEGORIES

The technical categories available for submission this year cover a number of areas central to the natural gas value chain such as the development of alternative energy production, carbon capture and nature-based solutions to help address emissions.

OPERATIONAL EXCELLENCE

With the rising complexity, costs and risks associated with energy production, boosting operational efficiencies has become more important than ever. Change can be challenging but excellence is mandatory.

CIRCULAR ECONOMY

To build an inclusive, green, and long-lasting future, we must embrace the adoption of efficient, safe, and sustainable energy solutions.

TECHNOLOGIES

Innovation is the key for developing tomorrow's energy mix and creating long term value.

CARBON NEUTRALITY

Acting together to develop a net zero carbon footprint, while ensuring access to affordable and modern energy for all is a major challenge facing the industry. We invite you to submit your abstract and join the community of technical experts from around the world who are gathering in Ravenna next May!

PAPERS CAN ADDRESS THE FOLLOWING TOPICS:

OPERATIONAL EXCELLENCE

- > Asset Management
- > Operations Optimization
- > Asset Digitalization
- > Data Management
- > Robotics
- > Energy efficiency

CARBON NEUTRALITY

- > Circularity Measurement
- > Asset circular conversion
- > Circular design
- > Circular products
- > Circular Value Chains
- > Circular Bio-refineries

TECHNOLOGIES

- > Onshore renewables
- > Offshore renewables
- > CCS
- > Hydrogen
- > GHG Reduction
- > Nuclear energy

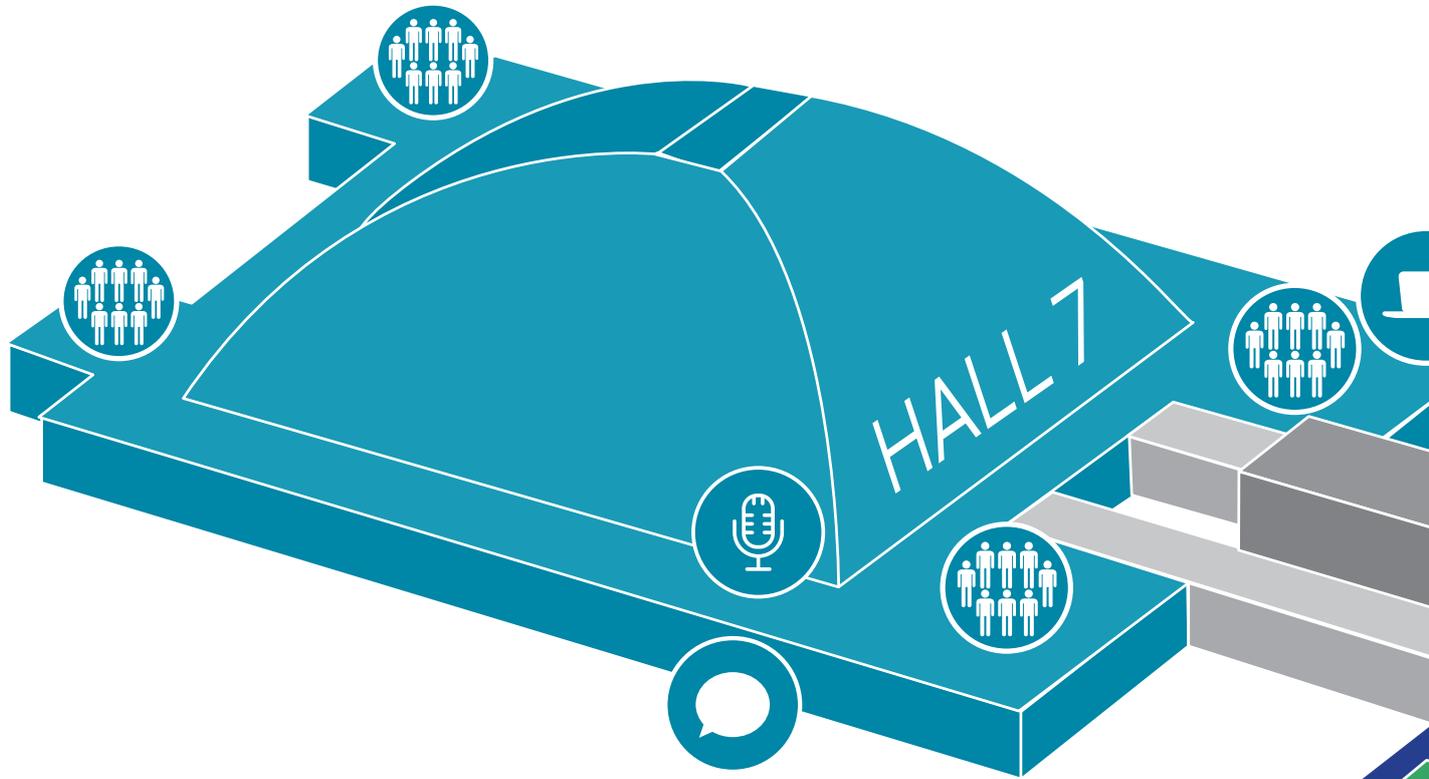

CIRCULAR ECONOMY

- > Breakthrough technologies
- > Innovative methodologies
- > First of a kind
- > Deployment
- > Scale up
- > O&G Technologies
- > Decarbonisation

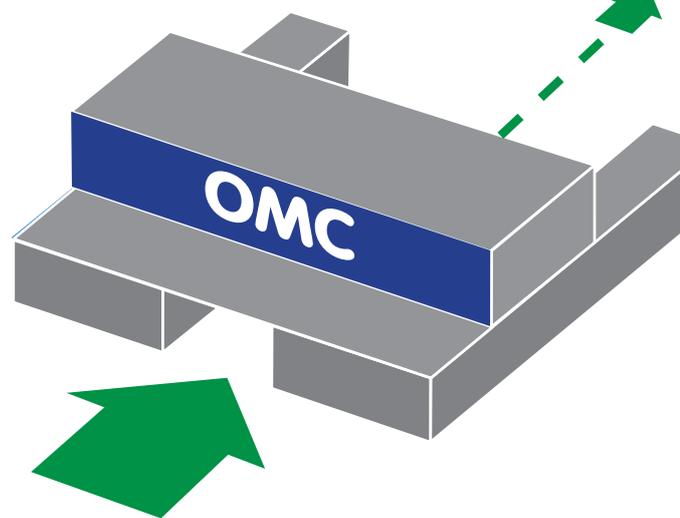

*“Explore Ravenna and its thousand faces.
Discover its territory and find your inspiration.”*

OMC 2023 VENUE

OMC events are held in Italy, at Pala de André - Viale Europa, 1, Ravenna, which is located on the eastern outskirts of Ravenna, a 5 minute drive from the city centre. Parking spaces are available free of charge at Pala de André and nearby.

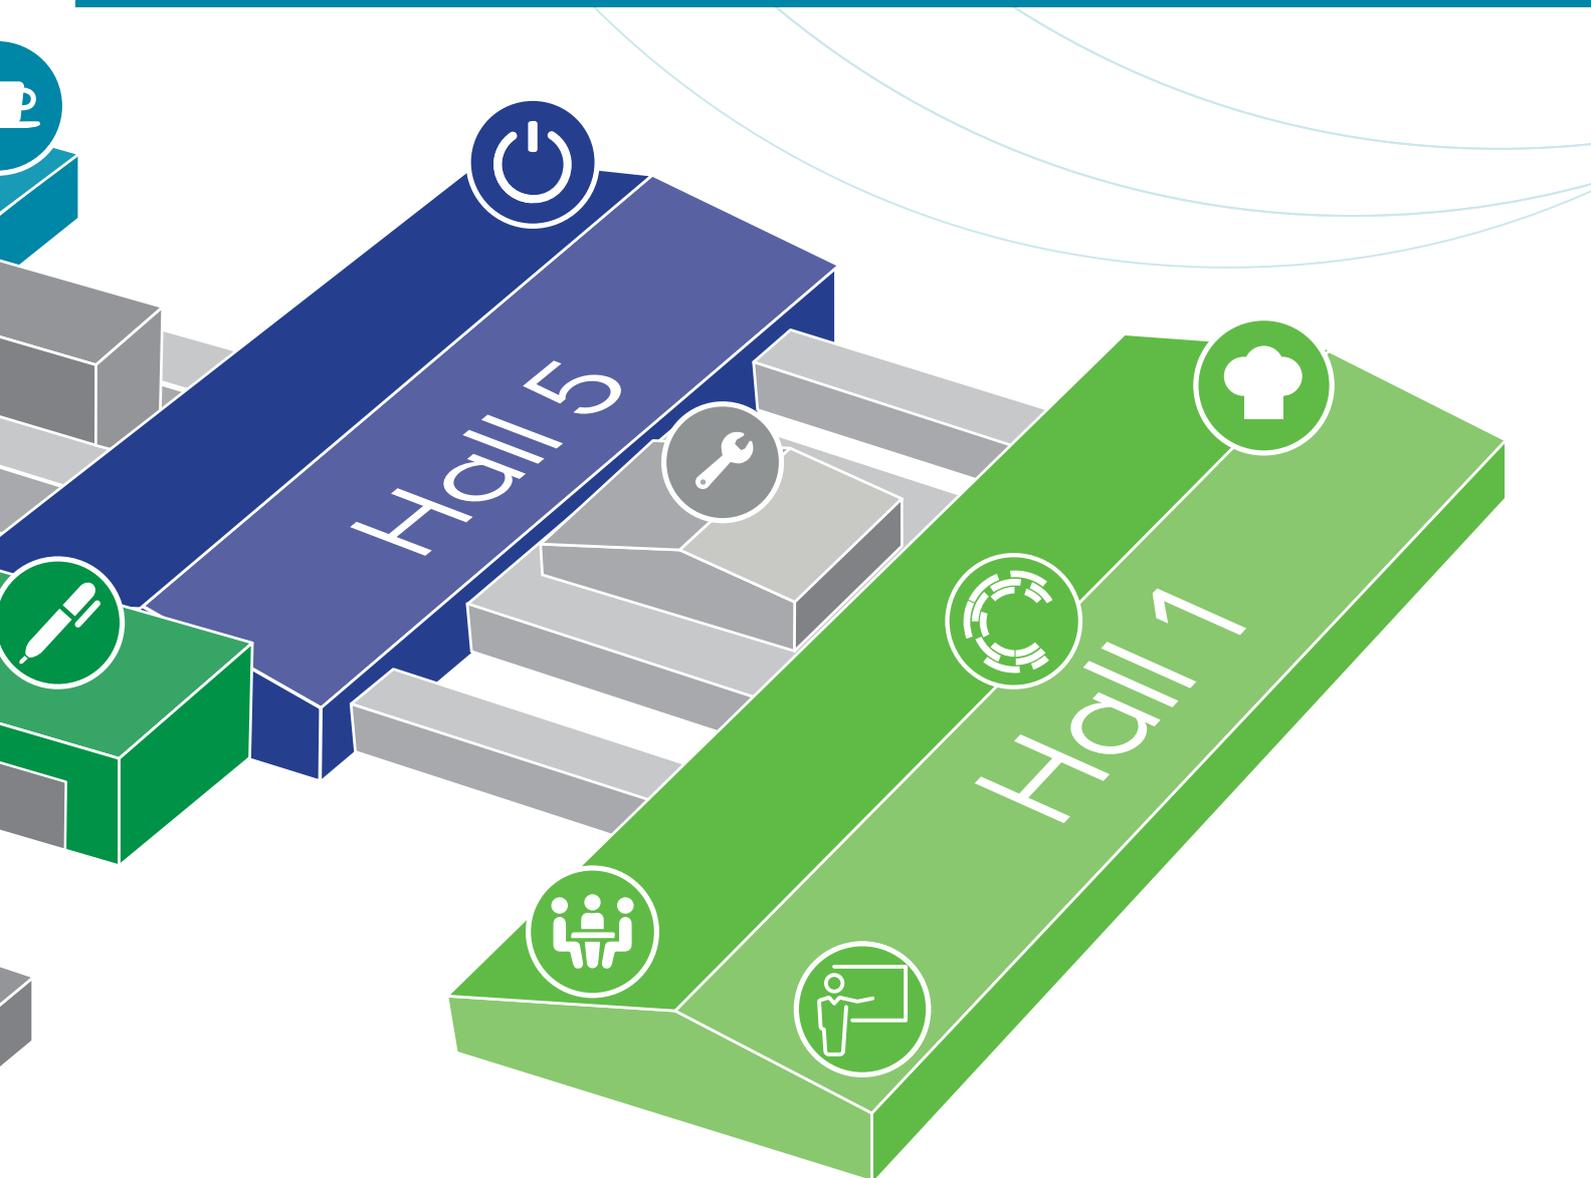

Ravenna is rich of monuments and mosaics from its glorious imperial past. Home to 8 UNESCO world heritage sites and a lively cultural scenario, Ravenna is a pleasant quiet city to wander where to enjoy the real local feel, at any time of the year and offer everything necessary to make every leisure and business trip something to remember: sightseeing, nightlife, modern facilities, excellent cuisine.

As one of the largest and leading events in the sector, the OMC 2023 venue is well prepared to welcome thousands of attendees as well the key players in the energy industry.

The venue offers a purpose-built networking space to help you conduct new business and as well as a hosting a number of on-site services provides a comfortable place to meet, do business and enjoy a number of conference and workshop sessions.

To this purpose there are a wide range of dedicated spaces that have been designed to boost networking opportunities, attend workshops and meet new business partners including the 'Net Zero Plaza' (in Hall 5), the Exhibitor Showcase, the Process Equipment Zone, and the B2B Matchmaking Program room (in Hall 1).

- | | | | |
|--|---|--|---|
|  REGISTRATION |  B2B MATCHMAKING PROGRAM |  BAR/CAFETERIA |  TECHNICAL SERVICES |
|  EXHIBITOR SHOWCASE |  INNOVATION ROOM |  CONFERENCE ROOM |  TOILET |
|  PROCESS EQUIPMENT ZONE |  SPEAKER HELP DESK |  OUTDOOR EXHIBITS |  MEDICAL AID |
|  DELEGATE RESTAURANT |  PRESS ROOM |  PARKING |  SHUTTLE STOP |
| | | |  ASSEMBLY POINT |

“We encourage exhibitors to activate their marketing kit tools as early as possible in order to attract new clients.”

EXHIBITING AT OMC 2023

THE PREMIER INDUSTRY EVENT DRIVING THE ENERGY TRANSITION THROUGH TECHNOLOGY AND INNOVATION

With a near 30-year history, OMC has grown to become the premier industry gathering in the region and has helped hundreds of companies achieved both growth and success through top level networking, B2B matchmaking and the assessment of the latest drivers impacting the sector.

From operators and suppliers, policy makers and international companies as well as new start-ups, OMC brings industry into one place to meet and do business. With Ministers, government officials, CEOs, analysts, entrepreneurs, managers, engineers and project managers, OMC is the place to meet those that can help you reach your corporate and project goals.

AT OMC YOU FIND....

- > 12,000 ATTENDEES
- > 350 EXHIBITING COMPANIES FROM 25 COUNTRIES
- > 5 EXHIBIT PAVILIONS
- > 7 CONFERENCE HALLS
- > INNOVATION ROOM
- > EXHIBITOR SHOWCASE
- > PROCESS EQUIPMENT ZONE
- > ENERGY INDUSTRY ASSOCIATIONS
- > B2B MATCHMAKING PROGRAMME

...AND BOUNDLESS BUSINESS PROSPECTS!

Clean, reliable, economically accessible are the key words of today energy industry: show the international energy industry your highest levels of efficiency while strengthening your market positioning.

- > Meet investors and new partners
- > Build network and get new contacts
- > Get access to the decision makers and specialists lay the base for future agreements and contracts recruit new talents
- > Arrange b2b meetings

NOW TAKING STAND BOOKING FOR OMC 2023!

WHATEVER YOUR OBJECTIVES AT OMC ARE, WE WILL HELP YOU TO BOTH ACHIEVE & EXCEED THEM.

OMC is the leading energy event, enabling commercial experts and technical innovators to discover business-changing insights, explore innovative solutions and build profitable business connections.

As optional services, you can add a choice for setting up the exhibition space, to select from the packages that we provide:

SHELL SYSTEM: € 60.00/SQM

it includes walls and carpet, lighting and electrical socket, table and 2 chairs, locker, coat hanger and basket, top sign with the company name in standard characters

TURNKEY SYSTEM: € 85.00/SQM

it includes walls and carpet, lighting and electrical socket, office area bordered with a wall where there are table, 2 chairs and locker, and reception zone with counter and stool, coat hanger and basket, top sign with the company name in standard characters and the full color logo.

All prices in Euro excl. VAT

BOOK YOUR STAND AT
www.omc.it/en/stand-booking
or contact us at
exhibition@omc.it

SPACE COSTS

- **SPACE RATE € 435.00/SQM**
- **REGISTRATION FEE € 490.00/COMPANY**

Included in the stand fee:

- Unlimited number of badges for stand personnel
- One conference pass at reduced price per stand
- Catalogue listing
- Web entry listing
- App entry listing

“Presentations are promoted on the OMC website, newsletters, social networks and all the event promotional collaterals.”

EXHIBITOR SHOWCASE

The OMC 2023 Exhibitor Showcase is a reserved space located in the OMC exhibition hall where eligible companies can run a presentation or hold a workshop about their projects, technologies, and activities.

The area is fully A/V equipped and can host up to 100 participants. Bookings are also open to non-exhibiting companies, whose products or services are in line with OMC’s themes and topics. Access to the Exhibitor Showcase is free of charge for all OMC attendees. Visitors and invited guests are only required to show/proces a standard advanced registration.

The area is set up in theatre style with capacity for up to 100 people and with a stage for up to three speakers and a podium, the space provides an excellent platform to showcase your products and services. The space can be rented for either single or multiple slots with each slot reserved for 45 minutes.

Presentations are also promoted on the OMC website with newsletters, social networks and all the event promotional collaterals. A dedicated online form is also available on the OMC website for attendees to register.

Included Benefits:

- Rental time for 1 slot: 45 minutes
- 1 hostess to check access and dedicated assistance
- A/V equipment: microphones at the head table and podium, PA system, video projector, slide clicker/pointer, VGA/HDMI connection to the exhibitor's laptop
- Seats for up to 100 people
- Refreshments: water, tea/coffee, fruit juices
- Dedicated registration form for attendees on the OMC website (data collection of registrants)
- Your logo, company contact details and a 50-word presentation in the ‘Side Events’ page of the OMC website, Exhibition Guide and Conference Programme

Download the Exhibitor Showcase presentation at www.omc.it/en/exhibitorshowcase or contact us at exhibition@omc.it

PROCESS EQUIPMENT ZONE

The OMC 2023 Process Equipment Zone is a dedicated & reserved workshop space located in the OMC exhibition hall, where eligible companies can give a presentation, or hold a workshop showcasing their projects, technologies and activities that are specifically related to the topic of processing equipment.

Continued development in process equipment technology is crucial for the energy to ensure that our finite energy resources are produced in a cleaner, faster, and more cost-effective way to support our energy transition. This can only happen through modern and cutting-edge technology such as compressors, pumps and valves that allows us to process energy to the utmost efficiency.

This dedicated zone provides a unique opportunity to showcase your company's latest technologies through live presentations to a wide audience of potential partners.

Included Benefits:

- Rental time for 1 slot: 20 minutes
- Seats for up to 50 people
- A/V equipment: microphones at the speaker's podium, PA system, 50" wide screen, slide clicker/pointer, VGA/HDMI connection to the exhibitor's laptop
- Your logo, company contact details and a 50-word presentation in the 'Side Events' page of the OMC website, Exhibition Guide and Conference Programme

Download the Process Equipment Zone presentation at www.omc.it/en/processequipmentzone or contact us at exhibition@omc.it

Leaders and top players in the process equipment industry are invited to join the opportunity of being a sponsor of the OMC 2023 Process Equipment Zone! Learn more by asking exhibition@omc.it

“Networking at OMC is a serious matter,
and sponsorships always deliver a return on investment.”
